

Resource/Learning Support Program

Mission Statement

This program exists to support and complement the parents in providing a learning environment that fosters growth and considers the individual needs of the child. Its primary purpose is to assist students, each with a unique learning style and varying **strengths and abilities**, to grow into the fullness of life in Jesus, to be members of the community of believers, and to teach the redeeming message of God's love.

It further commits itself to the following goals:

1. To teach all students by acknowledging and responding to the learning styles and needs of each student
2. To proactively guide all students to reach their full potential
3. To serve as Christ-like models in spreading the love for each student as a unique gift of God
4. To create the most appropriate activities which will allow all students to have success within their learning environment
5. To provide ongoing evaluation of each student's progress, thereby enabling each student to have success and challenge in learning
